

## Hightower

Aeon Rocket, designed by Morten Voss, is a series of beautiful, harmonious, and striking pendants. The first pendant in history to take full advantage of the luminous qualities of metal and polypropylene in a single design, the simple upper shade ensures plenty of light downwards, while the lower polypropylene shade illuminates and diffuses the light. The gauzy lower shade consists of 8 long bands carefully woven together to create round openings, allowing the light to stream through, unhindered. Available in Black or Gray semi matte lacquer in two sizes.
