

Hightower

The Nest Tables are the latest addition to the popular Nest series from Swedish design powerhouse Form Us with Love. The curved surface is robust and convivial, a movable table in a natural material for people to comfortably gather around, or host meetings and casual collaborative activities. But the tables are not all social objects. They work well as single workstations, creating an atmosphere that merges private and common spaces. Extruding warmth and character, these solid oak tables come in 6 different sizes, easy to place in any setting.
